Dear Friends,

Greetings from Manipal! The department of Dermatology, Kasturba Medical College, Manipal, of Manipal University is pleased to organize a CME cum workshop on phototherapy. Over many centuries, "heliotherapy" or treatment with sunlight has been used in the treatment of skin diseases. The real interest in phototherapy began when Niels Finsen received Nobel Prize for his therapeutic results with ultraviolet radiation in lupus vulgaris. The development of PUVA in 1974 and narrow-band UVB in 1988 has resulted in greater use of phototherapy for the management of dermatological diseases. Targeted phototherapies with higher dosages for lesional skin resulting in rapid clearing and longer remission rates, have also been developed. This workshop is designed to provide knowledge and practical tips in the use of commonly used phototherapy modalities like UVA, NB-UVB, targeted phototherapy and MED demonstration, both for the beginners and the experienced. We request you to make use of this opportunity for enhancing your knowledge on phototherapy and register at the earliest.

Dr. Sathish Pai B
Organizing Chairperson

Dr. Sudhir Nayak U.K.
Organizing Chairperson

**Speaker Affiliations:**

1. Dr. Robert Dowe, Consultant Dermatologist, Ninewells Hospital and Medical School, Dundee, Scotland U.K.
